Personal AI clinics.
In every home.

It starts in the bathroom. The bathroom becomes the Healthroom.

THE PROBLEM

Current clinics are blind, slow and out of reach.

300 billion

Daily body changes

Current measurements capture only occasional snapshots.

38%

Kidney disease discovered late

Of kidney patients discover their condition only after their kidneys have failed.

28%

Required care skipped

Of US adults skip required healthcare because of high costs.

Company-supplied figures

CONTINUOUS CARE

Track. Interpret. Act.

01

Track

Observe biological changes in the body as they happen.

02

Interpret

AI and doctors interpret meaningful changes in the background.

03

Act

Daily actions and personalised care guidance informed by continuous insights.

Continuous care happens at home. It starts in the bathroom.

SOLUTION

Deep biology, tracked on every toilet visit.

A device that clips onto any toilet and tracks deep biological markers every time you use it.

In your daily flow

No behaviour change. Tracking happens seamlessly every day.

3000+ validated markers

Urine unlocks markers across disease detection and wellness optimisation.

Works across the family

Automatically identifies each household member and caters to their unique needs.

Collector · sensor · electronics

A HOUSEHOLD PLATFORM

Healthcare for every member, across the lifespan.

Womb

Pregnancy

Are baby and mum keeping well?

PlGF, sFlt-1, hCG

Ages 3-16

Children’s growth

Are they getting what they need to grow?

Iodine, NTX, nitrogen

20s-30s

Fertility

Are cycles doing well?

PdG, E1G, LH

Ages 25-40

Nutrition

Are supplements working?

Na/K ratio, B12, zinc

Ages 38-50

Longevity and menopause

Ageing speed and hormone balance

NAD+, PdG, neopterin

50+

Early detection

Heart, kidney, bone, cancer and neurological health

ACR, ADMA, TERT, beta-amyloid

TECHNOLOGY

Programmable antibodies. 90 days of tracking.

Clinical-grade precision

Programmable for any biomarker

Synthetic DNA allows sensors to be engineered for biological targets simultaneously.

120 tests per cartridge

Automated longitudinal tracking, packaged for a quarter of use.

AI bio models accelerate experimentation

Computational DNA design and automated wet labs increase throughput and assay robustness.

BIOMARKER ROADMAP

Performance and nutrition in 2027. Inflammation and kidney health in 2028.

January 2027

Performance

Cortisol and hydration

Demonstration

July 2027

Performance and nutrition

Na, K, Ca, cortisol and urea nitrogen

Launch under FDA general wellness guidance

2028

Inflammation and kidney / metabolic health

Albumin

Prepare for FDA

2029

FDA target

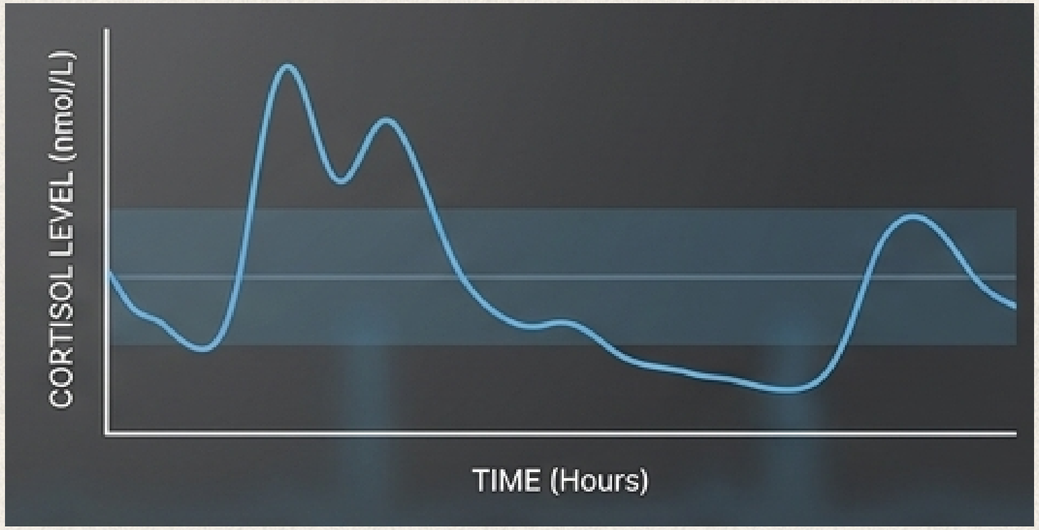

Regulatory milestone

Planned

Long-term goal: detect kidney decline earlier and reduce the need for dialysis and transplants.

THE ATHLETE WEDGE

Performance is the first wedge. Red Bull pilot signed.

Cortisol is the initial technical demonstration. The sensor is reported to work accurately across the full human physiological range.

Red Bull

Red Bull pilot signed for sports and peak-performance optimisation.

Energy, stress and weight management

The infrastructure is already installed.

3,000,000,000

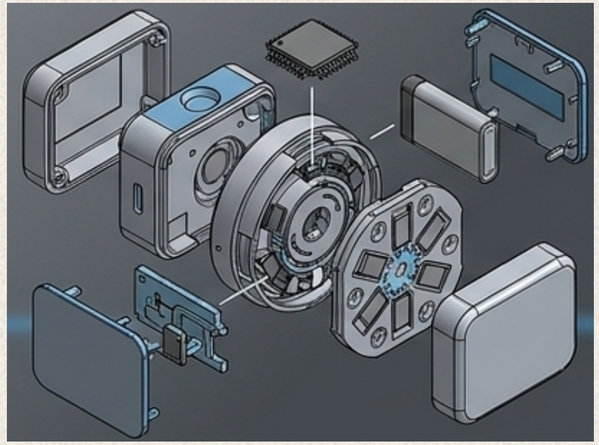

Toilets

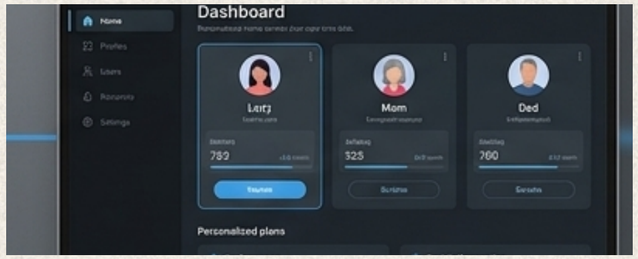

A foundation for global health tracking, already present in homes around the world.

BUSINESS MODEL

One device for the whole home.
10 cents per reading.

$25
Device COGS
One-time

$11
Cartridge COGS
Replaced quarterly per person

$0.10
Cost per test

$49 per month

Device and one user

$25 / month for each additional household member

80% Gross margin

Personalised plans for performance, osteoporosis and inflammation.

POSITIONING

A clinic that checks you every day, from home, at 1/100th the cost.

	Labs / clinics	DTC labs	Toilet products	CGMs	Trace
Frequent measurements	✗	✗	✓	✓	✓
Low cost per measurement	✗	✓	✓	✗	✓
Broad reach and at-home access	✗	✓	✓	✗	✓
No behaviour change required	✗	✗	✓	✗	✓

Multiple biomarker panels	✓	✓	✗	✗	✓

Company comparison

TEAM AND ADVISORS

Healthcare and biotech, inside out.

Tushar

- Led scaling at two health-tech unicorns
- Clinical trials and regulatory pathways
- Bio-signal processing

Harshit

- Former lead architect at top biotech R&D
- Medical device engineering
- Hardware-software integration

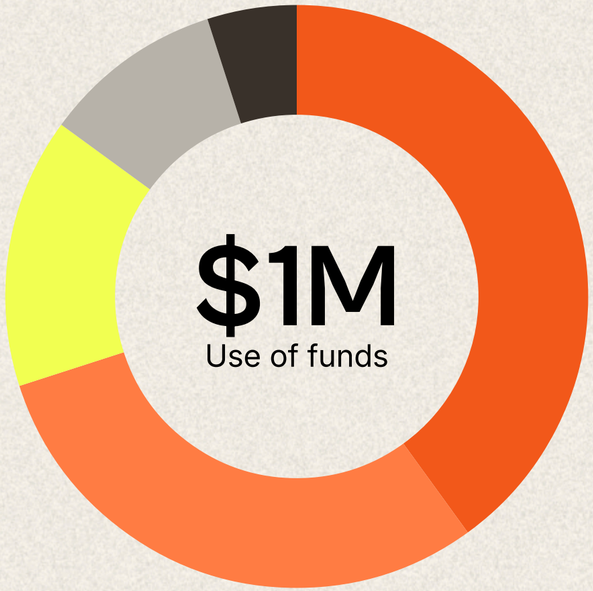

Advisors

Value inflection

	Today	End of round
Device	Lab sensor	Installed in real toilets, tracking weeks of trends
Market	30+ interest	Paying users, a winning story and AI tested
Platform	Cortisol	Cortisol and one new marker

NEXT ROUND

A $10M seed to bring the Healthroom into homes.

May 2027

PLANNED $10M SEED / READINESS TARGETS

Technical milestones

- Reliable unattended use over weeks
- Repeated measurements matching clinical gold standards
- Successful Red Bull field demonstration and multi-marker lab demo

Business milestones

- 50,000+ consumers on the waitlist and pre-orders
- Consumer thesis proven: users act on insights
- A scalable CAC/LTV equation proven

TRACE

Healthcare every day.
A Healthroom in every home.
For every member of your family.

The bathroom becomes the Healthroom.
